## 5 Minutes with

### Dr Bronwyn

Dr Bronwyn McMahon

Dr Bronwyn established Bayview Vets with her husband Dr Austin in 1991. When Bronwyn isn't in surgery, she is managing the clinic and all its wonderful staff or spending time with her family.

**Where did you study Vet Science?** I studied Vet Science at Qld University in Brisbane

**When did you know you wanted to be a vet?** I was always surrounded by pets and horses as a kid, so I always imagined I would be a Vet.

**What pets do you have at home?** Our dog Dodger, an ancient chooky and some gentle sheep.

**Why you love living in Hervey Bay?** I love the relaxed and friendly way everyone in Hervey Bay goes about their days.

**What would you be if you weren't a vet?** I would keep Bees and grow vegies.

This month we say a sad goodbye to Dr Breanna Cooper (sad face). We say goodbye because she is.....

## GETTING MARRIED!!!!!!!

We couldn't be happier for Bre and Liam as they start their new life together in Brisbane. We wish them all the best, but Bre will be greatly missed by the staff and patients at Bayview Vets!! (Sob, sob)

### Is your pet's Intestinal Worming up to date??

Did you know..... Puppies and kittens need to be wormed every 2 weeks until they turn 12 weeks old? Worming is then given monthly until 6 months of age then every 3 months thereafter.

**MILBEMAX™** is a worming tablet that delivers broad spectrum protection against common intestinal worms. When given routinely, it treats and controls hookworm, roundworm and flea tapeworm in dogs and cats. It also treats and controls whipworm in dogs. MILBEMAX™ is available over the counter at the clinic.

**MILBEMAX** 

*Bringing pets and people closer*
